

AF-015

MID-SPAN FIBER ACCESS TOOL

FOR 2, 2.5 AND 3 mm HOSES

EASY TO USE, FAST AND SAFE

The mid-span fiber access AF-015 is a convenient and safe tool to expose the optical fibers contained in hoses with 2, 2.5 and 3 mm buffers.

The tool produces two separate cuts separated 180° from each other. The blades are built inside the tool, which makes it a safe instrument.
